Precept offers shoe and bootcovers in a variety of styles and materials. Shoecovers are constructed from materials ranging from a wet-laid nonwoven and plastic film to polypropylene, Tyvek<sup>®</sup>, and multi-layer SMS. Shoecovers are also available with or without the Safe-T-Tred<sup>™</sup> anti-skid tread, and come in regular or x-large sizes. Precept's shoecovers are packaged in both dispenser boxes and bulk, for customer convenience.

Precept's exclusive FluidGard<sup>™</sup> bootcovers are designed to protect the wearer from potentially infectious fluids. The polyethylene coating seals the boot covers against fluids. Anti-skid strips help provide traction on a variety of surfaces.
